

AUXILIARY PARKING SENSOR FOR TRAILERS, TRUCKS AND BUSES

THE REVERSE MANEUVER WAS SAFER.

The kit comprises:

- 4 sensors
- 4 x rubber pads and conduit for added sensor protection
- 1 x IP68 control unit
- 4 x 2 meter extension cables
- 1 siren water resistant with 110 decibels.

Optional:

- 2 LED horns.

BENEFITS

When the vehicle is equipped with the system, when engaging reverse, the siren will sound proportionally to the distance from the rear obstacle, increasing its intensity according to the variation in the distance and proximity of the rear obstacle. Being the range of the system from 1.5 meters to 0.3 meters away.

When equipped with the horn light it copies the intensity of the siren.

The system is installed on a trailer/trailer, the sensor is attached to it, this way

Any truck that hitches this trailer and feeds the friendly hand socket will be able to take advantage of the auxiliary parking sensor, thus increasing your safety in manoeuvring.
